ADO E-BIKES 2026

Unlock possibilities of life

We're on the move. Every day. Between meetings. Between ideas. Between moments. Life doesn't wait. It moves. And we move with it. Lightweight. Compact. Ready. We take the direct route. Through the city. Past the traffic. Up the stairs. Into the elevator. Onto the train. Out into the green. Along the river. Up the hill. Toward the sun. Fresh air. Clear mind. New energy. More freedom. More flexibility. More life in the moment.

What moves with us? An e-bike built for exactly this. Compact in size. Big in potential.

Light. Foldable. Compact.

Easy to ride

Getting on feels like stepping in. Setting off is effortless. The upright riding position provides comfort and clear visibility while the steering remains controlled and agile. Powerful brakes deliver confidence and the motor assistance engages smoothly at exactly the right moment. The result is a natural riding experience from start to finish – safe and comfortable. Made for everyday life. Ready for every situation.

Easy to carry

Lightweight and compact by design. Easy to lift, easy to store. Select models fold in seconds for even greater flexibility. The battery can be removed quickly for convenient carrying and charging. Less bulky. More freedom.

Easy to store

Compact proportions make storage simple at home, on the train, in the trunk or at the office. Designed to fit where larger bikes cannot, select models fold down even further when space is limited. Less space required. More room to move.

Easy battery

The battery is elegantly integrated into the seat post and can be removed and reinserted within seconds. Simply in and out - hassle-free. The saddle remains in place, making the battery easy and comfortable to carry. All batteries can be charged in- or outside the bike.

ADO AIR CARBON PRO

Air Carbon Pro

Built to Go Anywhere.

Auto dual-speed system with stronger torque, lighter weight, and NFC unlock for a smarter, easier ride.

Stylish. Versatile. Comfortable.

Lightweight Frame

Our electric-assist bicycle stands out for its exceptional ultra-lightweight design. Weighing just 24.5 kilograms, it is over 30% lighter than comparable models. Our aim is to provide you with a comfortable riding experience.

Adjustable suspension

The suspension may be activated or deactivated according to road conditions, with freely adjustable firmness settings. This delivers optimum ride comfort across diverse surfaces, from paved urban roads to unpaved country lanes..

Equipped with a torque sensor

A torque sensor is a device capable of precisely detecting the force applied to the pedal, providing appropriate assistance based on the intensity of the pedal stroke. This prevents discomfort caused by sudden acceleration or delayed assistance.

Easy battery

The battery is elegantly integrated into the seat post and can be removed and reinserted within seconds. Simply in and out - hassle-free, no fiddling. The saddle remains in place, making the battery easy and comfortable to carry. All batteries can be charged in- or outside the bike.

Air 28

Agile. Durable. Secure.

Belt Drive

The ADO Carbon Belt Drive offers 98% efficiency, runs 36% lighter than chains, and lasts up to twice as long. No oil, no rust, no noise – just smooth, silent, and effortless riding.

Automatic Shifting System

Featuring the world's first intelligent 3-speed automatic internal gear system. No manual intervention required – it automatically shifts to the optimum gear based on your speed, ensuring you maintain efficient cadence and power output at all times.

Navigation & IoT GPS System

Experience next-level connectivity with the ADO App. Enjoy smart control, real-time GPS tracking, 4G connectivity, and in-app navigation – all backed by ADO Lab innovation and dedicated customer support. Locate your bike, set safety zones, receive smart alerts, and ride with total confidence wherever you go.

Ultra-Slim Battery

Unlock up to 100 km of riding freedom. Our battery features an ultra-slim side-shift design that seamlessly integrates sleek aesthetics with dependable, long-range performance.

ADO x Plant-for-the-Planet

We are committed to planting one tree for every e-bike sold, thereby supporting the reforestation efforts of Plant-for-the-Planet.

Plant-for-the-Planet is a global initiative that campaigns for climate justice and a livable future. The organization supports the protection and restoration of forest ecosystems in Mexico, Ghana, and Spain, empowers children and young people to take action, conducts research, and provides tools and guidance for reforestation projects around the world.
